

Ours Products

Taxi Terminal

- Resolution 1024x600
- Android 10 & 13
- Compatible 3G/4G/5G

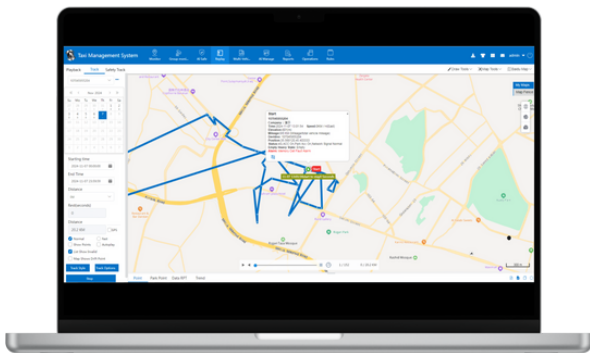

Taxi terminal is equipped with revenue, map navigation and other functions. It integrates seamlessly with the fleet management platform to optimize performance and reduce costs.

Truck Terminal

- Resolution 1024x600
- Android 10 & 13
- Compatible 3G/4G/5G

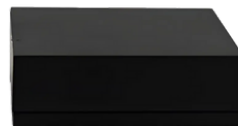

The intelligent truck terminal is equipped with Real-time video, intercom/monitor and other functions. It integrates seamlessly with the fleet management platform to optimize performance and reduce costs.

Fleet Management Platform

- Track Your Vehicles
- Driving behavior analysis
- Data report generation
- Custom booting start logo for your company

Is an integrated fleet management solution that provides real-time tracking and data analytics to help organizations improve operational efficiency and safety.

Canbus

- Send information about the mileage and fuel to the Fleet Management Platform

The CANBUS taximeter is connected to the vehicle terminal, receiving pulse signals to gather data on vehicle speed and mileage, and calculating the current operating fare based on mileage to enable pricing functionality.

Ours Products

ADAS Camera

- Monitors the road and driving environment
- Helps avoid accidents by detecting hazards
- Enhances overall driving safety by providing real-time alerts about road conditions

ADAS cameras are equipped with built-in vision sensors that are connected to on-board terminals, offering a variety of driving assistance functions, such as lane departure warning, front collision warning, and pedestrian detection, to enhance driving safety and minimize the occurrence of traffic accidents.

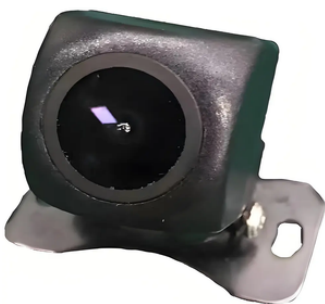

DMS Camera

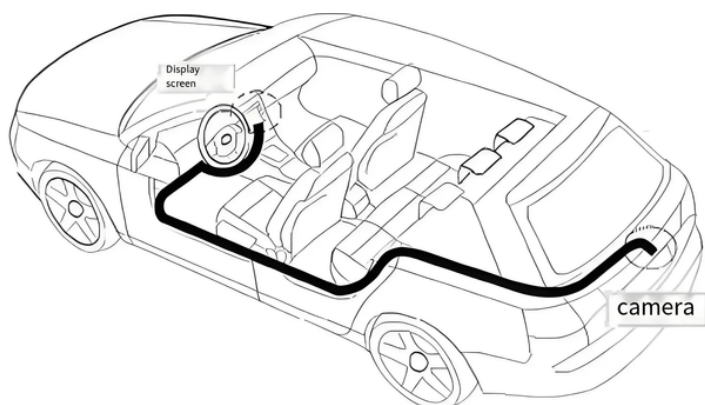

- Monitors the driver's behavior
- Detects fatigue, distraction, and seatbelt usage
- Alerts for tired or distracted driving, seatbelt reminders

DMS cameras can monitor driver behavior, such as tired driving, smoking, etc. Real-time monitoring and real-time alerts are provided through a fleet management platform to improve driving safety.

Rear Camera

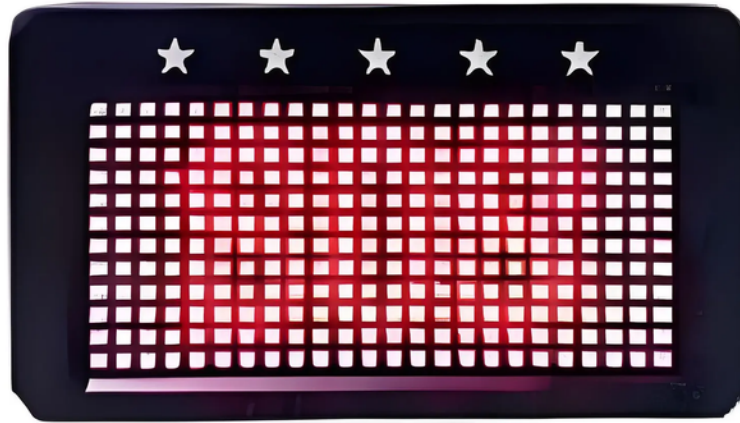

- 720P resolution

The rear-view camera provides a clear rear image through the connected terminal, which can detect and avoid blind spots and obstacles when reversing, reduce the risk of collision, and further improve the accuracy and safety of operation.
